

The image shows a modern, minimalist house entrance. A dark grey door with a vertical glass panel is partially open, revealing a woman in a light blue shirt and dark pants walking through a large glass window. She is carrying a black bag. The house has a light-colored stucco exterior and a dark roofline. The foreground features a stone path leading to the door, flanked by wooden planters with greenery. The overall aesthetic is clean and contemporary.

 WIŚNIOWSKI

Your home starts here

NOVA | NOBE

Everything starts **at home.**

Every home tells a unique story that deserves the very best. We are proud that our garage doors, windows, doors, gates, and fences are part of these stories. Part of a good future, planned responsibly. For us, a home is not just a place where we live every day, where we relax, share joy, make our dreams come true or pursue our passions... A home is also everything that surrounds us: nature, people, and a space to grow, learn, and work.

With your homes in mind, the WIŚNIEWSKI brand develops its products and organization in a sustainable way, with respect for what truly matters.

35 years of bringing a vision to life - one in which we combine the very best.

This is how **comfort is made**

Every leaf is a thoughtfully engineered structure that combines aesthetics, security, and everyday convenience. Discover the elements that make up the aluminium-and-steel **NOVA doors**.

Scan to see the door
in your own space.

Sealing without compromise. Installation possible even in locations without a canopy.

Thermal comfort - silence and security enclosed in a solid structure.

Warm leaf
78 mm thick

Precise adaptation to your design. **Aluminium opening frame manufactured to size.**

Safe triple-glazed unit

6 anti-burglary bolts as standard, for your safety.

Certified security - RC2 class, effective even without locking.

Lock cylinder with 3 keys included

Customization options

Easy installation and perfect fit. Three hinges adjustable in three planes.

Additional insulation and durability. Aluminium threshold with a thermal break (optional accessory) for demanding users.

The warmth of **natural** shades

Doors in wood-inspired colours bring calm, balance, and soft light to the entrance. A subtle texture, muted tones, and organic lines create a sense of closeness. A great choice for those who value natural materials while expecting modern solutions.

up to 5-year **warranty**

The wood effect can be achieved using the DECOR coating technique or by applying a film coating that gives the surface an interesting texture.

Bold choices

Not every colour has to blend into the background. Red adds energy, green brings a sense of calm, and deep blue draws the eye. Doors in bold shades are a conscious choice – for those who want to highlight the character of their home from the very entrance.

The 60-30-10 rule is a simple way to achieve a harmonious façade colour scheme. It involves using 60% of a dominant base colour, 30% of a complementary colour to emphasize the details, and 10% of a striking accent that gives the composition its character. The result is a cohesive, aesthetic façade that is pleasing to the eye.

NOBE doors are a popular choice as a complement to the NOVA main entrance doors, especially for **side entrances or technical doors in other buildings.**

They are intended for locations that do not require advanced security features or extended functions, while still maintaining **a solid quality of workmanship.** Thanks to the Home Inclusive™ system, it is possible to achieve a cohesive stylistic match in terms of colours, textures, and details with the main entrance door. NOBE doors offer a practical and cost-effective solution that combines functionality with the aesthetic consistency of the entire property.

How does light transform a space?

Natural light is one of the most important elements contributing to comfort at home. In the entrance area, it plays a particularly vital role. This is where the daily journey through the interior begins. With carefully selected glazing options, such as sidelights and toplights, you may not only enhance the

functionality of the space but also give it a distinctive character.

A door made **for you**

Choosing a door is an investment in everyday peace of mind and comfort. Before you decide on a specific model, go step by step and identify what matters most to you.

01 **Prioritize good parameters.** Choose consciously: thermal insulation, resistance to weather conditions, burglary resistance class – it all matters.

02 **Define the style of your home.** Choose a door design that matches the architecture and façade.

03 **Decide on the colour and finish.** Standard colours, Home Inclusive colours, wood-effect finishes – choose what works with the surroundings.

04 **Choose glazing and sidelights.** Let in natural light, highlight the character of the entrance, and improve everyday comfort of use.

05 **Select a handle or pull.** It's a detail that makes a difference.

06 **Think about useful functions.** Do you want to control the door via an app, add access control, or integrate it with your home system?

07 **Consult an advisor.** A good choice isn't just about looks – it's comfort, security, and durability for years to come.

08 **Enjoy the right choice.** With WIŚNIEWSKI, you can create a door that's perfectly tailored to you.
